EDUCATION

Bachelor's of Software Engineering

3.98/4.0 GPA (93% average) with President's Scholarship and SE Entrance Scholarship.

University of Waterloo

2017 - 2022

SKILLS

HTML/CSS, JavaScript, Python, PHP, SQL, C, Swift 3 Languages:

Frameworks: Node.js, jQuery, AJAX, MySQL, MongoDB

Other: Linux, Git, Object-Oriented Design, APIs, Xcode, Vim

WORK EXPERIENCE

Software Developer

- Led the development of an HR automation system which drastically reduced redundancy in the hiring process for one of the fastest growing companies in Canada.
- Significantly increased company efficiency through creating an accurate resume parser and automating emails and calendar events with Google Apps Script.

Web Developer

ibrahimirfan.com/?p=11#modal

ibrahimirfan.com/?p=3#modal

Directly coordinate with clients to develop websites for their small businesses.

 Created a website for a consulting firm, ITEE Group Canada, to streamline their client-based service using HTML, CSS, JS, and PHP.

Software Developer

 Collaborated with a team to develop an Exam Network web application for over 20,000 students at the University of Guelph.

• Implemented a file system for course materials using JavaScript, including viewing, uploading, and downloading files.

Geotab

Jun 2017 - Aug 2017

Freelance

May 2017 - Present

Viceroy Media, Inc.

Jun 2016 - Feb 2017

PROJECTS

Self-Aiming Automatic Cannon

ibrahimirfan.com/?p=5#modal

Automatically fires a projectile towards a face in view, built using Python and a Raspberry Pi.

Conference Registration System

ibrahimirfan.com/?p=4#modal

Established a secure registration system for over 300 students using PHP and MySQL.

 Implemented a nametag generator with JavaScript and a live workshop display with PHP, indicating spaces currently available in each workshop.

Exam Parser & Web Application ibrahimirfan.com/?p=2#modal

• Securely handled over 200 user accounts using PHP and MySQL, implementing industry standard database security measures (hashing, salting, etc).

 Developed a Node.js script to accurately parse PDF practice exams and output self-marking online forms to a web application, including a login system with admin access.

Personal Project

Nov 2017

Bridge Day

Apr 2017

IRHS DECA

Jun - Sep 2016

ACHIEVEMENTS

3rd Overall & Best Hardware

ibrahimirfan.com/?p=0#modal

Apr 2017

MasseyHacks III

Loran Foundation

• Engineered a device for the blind which speaks out the word that a user hovers their finger over on a physical page of text, using a Raspberry Pi, Node.js, MongoDB, and Python.

Loran Scholarship Semi-Finalist

Recognized in the top 8% of applicants for Canada's most prestigious scholarship.
