WORK EXPERIENCE

Software Developer

- Led the development of an HR automation system which drastically reduced redundancy in the hiring process for one of the fastest growing companies in Canada.
- Significantly increased company efficiency through creating an accurate resume parser and automating emails and calendar events with **Google Apps Script**.

Web Developer

ibrahimirfan.com/?p=11#modal

ibrahimirfan.com/?p=3#modal

- Directly coordinate with clients to develop websites for their small businesses.
- Created a website for a consulting firm, ITEE Group Canada, to streamline their client-based service using **HTML**, **CSS**, **JS**, and **PHP**.

Software Developer

Collaborated with a team to develop an Exam Network web application for over 20,000 students at the University of Guelph.

• Implemented a file system for course materials using **JavaScript**, including viewing, uploading, and downloading files.

Geotab

Jun 2017 - Aug 2017

Freelance

May 2017 - Present

Viceroy Media, Inc.

Jun 2016 - Feb 2017

PROJECTS

Self-Aiming Automatic Cannon

ibrahimirfan.com/?p=5#modal

• Automatically fires a projectile towards a face in view, built using Python and a Raspberry Pi.

Personal Project

Nov 2017

Conference Registration System

ibrahimirfan.com/?p=4#modal

Bridge Day

Apr 2017

• Established a secure registration system for over 300 students using PHP and MySQL.

 Implemented a nametag generator with JavaScript and a live workshop display with PHP, indicating spaces currently available in each workshop.

Exam Parser & Web Application

ibrahimirfan.com/?p=2#modal

IRHS DECA

- Securely handled **over 200 user accounts** using **PHP** and **MySQL**, implementing industry standard database security measures (hashing, salting, etc).
- Developed a **Node.js** script to accurately parse PDF practice exams and output self-marking online forms to a web application, including a login system with admin access.

Jun - Sep 2016

ACHIEVEMENTS

3rd Overall & Best Hardware

ibrahimirfan.com/?p=0#modal

MasseyHacks III

• Engineered a device for the blind which speaks out the word that a user hovers their finger over on a physical page of text, using a **Raspberry Pi**, **Node.js**, **MongoDB**, and **Python**.

Apr 2017

Loran Scholarship Semi-Finalist

• Recognized in the top 8% of applicants for Canada's most prestigious scholarship.

Loran Foundation
